Product code: SCS-ALW, **REDCARE**

The **REDCARE** service provides continuous monitoring of alarm system professionally installed by SCS to an Alarm Receiving Centre (ARC) which means continuous protection 24X7 Unlike other alarm signalling services, Redcare both alerts the ARC when it detects a line cut and provides encryption to prevent the substitution of equipment or "spoofing" (emulation) of line conditions. This is why Redcare is the most secure system of its kind.
