- > 1 Digital Video Recorder H264
- > 4 Night Vision Dome Cameras
- > 4 Internal Dome Camera
- > 1 LCD 19" Monitor
- > 1 100 mtr Cable
- > 1 Power Supply 12 Volts 5 Amp
- > Remotely Monitor on the move with your Phone
- > Quality Installation

1. Access - enables you access live camera streams over Mobile and internet from anywhere using a standard Web browser on any PC.
2. Increased Scalability - Easy to add number of additional devices to the system such as cameras, workstations, storage, etc. Adding a new camera just requires connecting the camera to the network. The device can be on the same physical site, or may be on the other side of the world.
3. Integration - CCTV can also be integrated with any other standard IT systems to provide centralised control.
4. High Video Quality - IP CCTV provides constant high video quality with no loss in quality during transmission, recording or export.
5. Storage – Since the video is stored as digital data along with other video-related metadata such as the camera ID, date and time, alarm information etc High-capacity Storage Area Networks can now be used to reliably store huge amounts of recorded video and provide instant access to this data from anywhere in the world.

Also available in 16 channel for more information Call us on 020 8471 6788.
